

[Engineering Design Project Presentations 2015/2016](#)

[The department of Environmental and Biosystems Engineering](#) organized Engineering Design Project Final Presentations for the 5th year students 2015/ 2016. The presentations were held on 31st March 2016 at the department's Upper Kabete premises.

Engineering Design Project is one of the units taken by undergraduate students during their final year. It requires the application of knowledge gained in the courses up to the final year. It provides the opportunity to apply knowledge gained in previous courses, to improve independent design skills, and to address the impact of specific engineering work on a larger process and/or society.
