

Prof. Werner Hofacker from Konstanz University of Applied Sciences in Germany visits the department

Prof Werner holds a PhD in Thermodynamics and Fluid Dynamics. The visit is a buildup on milestones of collaborations between the department of Environmental Process Engineering –Thermal process engineering at Konstanz University and the Department of Environmental and Biosystems Engineering at the University of Nairobi.

Prof. Werner is working closely with Dr. Mbuge and Mr. Peter Kimani on a Project in Thermodynamic Simulation Systems for drying and storage of maize grain.

On **8th November 2016** the visiting Professor had a successful deliberation meeting with departmental staff members on the ongoing collaboration project. **On 9th November 2016** Prof. Werner gave a lecture to fifth year and fourth year students in the Department.
