

The Departments of Environmental and Biosystems Engineering, MSc. Students presented their progress report to the panel of Department lecturers and post graduate students on 27th - 28th May, 2015. The presentation topics covered the core thematic areas of the department:

Environmental, Processing, power and Machinery, and water.

These show a wide range of students entering into the field of research assisted by their supervisors. From the presentation, students' topics were verified and are ready to hand in their proposals and others to present their final thesis report and also presenting to the board of engineering their final research.
